Dear Friends:

In 2012, the Visiting Nurse Association of Somerset Hills served more people than ever before! We helped our patients transition from hospital to home, manage their chronic conditions, deal with life-limiting illnesses and receive the education and support they needed to live independently. We were fully committed to giving all clients access to our full range of services.

As a trusted community health care resource, we are proud that our low hospital readmission rate and high patient satisfaction scores continue to surpass state and national benchmarks. In addition, we are pleased that in 2012, as testament to the specialized and compassionate hospice care provided by our team, 100% of family members of our hospice patients would recommend VNA of Somerset Hills Hospice to others. Finally, with expansion of the chronic disease management program and unique partnerships with other providers, we continue to be a leader with our innovative approach to health care.

Last year also brought the implementation of the Affordable Care Act, which reduced our funding and that of many other health care providers. Faced with these funding challenges, your gifts and partnership were essential in our successful efforts to fulfill our mission. In addition to our dedicated employees, volunteers were a vital part of the VNA family. Your contributions to fundraising events, patient support, and office projects provide us the extra assistance needed to deliver the best care and service experience to our clients.

Thank you for choosing to support the VNA. Through the art of caring at home, we will continue promoting the health, well-being and independence of all those in our community.

Warm regards,

Ann M. Painter, RN, MSN
President & CEO

Grania B. Allport, RN
Board Chair

YOUR GENEROSITY HAS TOUCHED LIVES

During 2012 your gifts enabled the VNA of Somerset Hills to fulfill our charitable mission and ensure that all patients received access to our full range of services, regardless of ability to pay or level of insurance coverage.

Thanks to your support, these and many other stories of care, compassion and recovery have been made possible.
A young woman with breast cancer received pain medication, medical care and family support necessary to spend her final months in the comfort and love of her sister’s home.

**VNA HOSPICE CARE** allows a patient with life-limiting illness to remain at home, together with family and loved ones, while receiving the medical, personal, emotional and spiritual care needed during this difficult time.

When her daughter’s home lost power and water during Hurricane Sandy, we arranged for Erma to spend two weeks receiving necessary care at a skilled nursing facility.

Through our **RESPITE CARE PROGRAM**, primary caregivers receive short-term relief from the everyday fatigue and stress of caring for a frail or disabled adult. This assistance helps caregivers maintain their own emotional and physical health while helping their loved one remain at home and out of a long-term care facility.

Suffering from dementia and diminished physical abilities, Jeanne gained mental and social stimulation through specially-designed interactive cultural presentations and hands-on therapeutic arts programs at the Adult Day Center. Knowing her mother was happy and safe, Kathy was able to work at home without constant concern for Jeanne’s care.

At the **ADULT DAY CENTER**, frail and chronically disabled adults benefit from the assistance, companionship and activity provided in our safe, structured environment. Caregivers enjoy peace of mind knowing their loved one is well cared for and safe.

Marie’s health and independence were severely compromised by congestive heart failure and chronic obstructive pulmonary disease (COPD). After three months following our customized care plan and utilizing a telehealth monitor, she bounced back to an extent her family never imagined possible. With the comfort and security afforded through daily remote vital sign monitoring, she now enjoys activities like swimming five days a week and comfortably walking the stairs to her second-floor condo.

**TELEHEALTH MONITORING** allows individuals with serious illnesses such as diabetes, COPD, heart failure, high blood pressure and coronary artery disease to remain living safely and independently at home.
